

ESCAPISM

Info	Born out of the idea to contribute to the Techno scene by carefully booking quality artists for intimate parties, Escapism came to life in 2013 when Manuel Münster started organizing the first Escapism-events in various venues throughout Berlin. In 2016, Manuel Münster joint forces with a close friend of his to take the next step and turn Escapism into a record label. Releasing music by close friends and artists that have played at the Escapism-parties, Escapism has been successful in creating its own niche in an oversaturated market. By being dedicated to releasing on vinyl and maintaining personal connections with the people they work together with, Escapism tries not only to establish longevity but also a firm sense of community with the artists affiliated with the label.
